Profile

Enthusiastic Android and React Native developer skilled in Java, Kotlin, and JavaScript. Experienced in building robust mobile applications with Firebase and Google Maps integration. Quick learner, ready to deliver innovative solutions.

Skills

Android Development(Java and Kotlin)

Java, Kotlin, Android SDK, Jetpack Compose
XML Layouts, Material Design Principles,
Android Studio, Gradle, Retrofit,Firebase,
Restful API integration, Push Notification,
Clean Architecture Principles.

React Native Development

JavaScript, React Native, Visual Studio,
Expo, React Navigation, Axios/Fetch,
Firebase, Styled-components, Hooks,
Integration with APIs, Cross-platform,
Performance optimization

Additional Skills

Version control, SQLite, Firebase,
Figma, Problem-solving.

Education

Bachelor of Computer Engineering

2020 – 2024

Mumbai University

Interests

Flute

Helps to relax my mind and teaches me patience.

Gamming

Sharpening my mind and developing focus.

Projects

Travelcompanion app, Jetpack Compose

Built a travel companion app with Jetpack Compose, featuring beautiful layouts, Google Maps implementation, Firebase authentication, and smooth user experience. The app fetches data from APIs to provide real-time travel information

Firebase Authentication, Jetpack compose

This project aims to implement secure and efficient user authentication within an Android application using Jetpack Compose, the modern UI toolkit for building native Android UIs, and Firebase Authentication, a robust platform for managing user identities.

LittleLemon Food ordering, React Native

The Food Ordering app in React Native, powered by Firebase Authentication, transforms how users connect with local restaurants, offering a convenient and tailored dining experience. Utilizing Firebase's authentication and real-time database with React Native's cross-platform benefits, the app delivers a scalable, responsive solution that boosts user satisfaction and supports restaurant business growth.

Google gemini, React JS

Developed a website using React.js, implementing the Gemini API for query handling and creating a beautiful, responsive layout.
